

PROCÉDÉ HENIQUI PROCESS

Biotechnological Process

A new and patented PROCESSING TECHNOLOGY WITHOUT CHEMICAL ADDITIVES without END RESIDUES

To OPTIMISE the nutritional value and SYSTEMATICALLY TRANSFORM organic material of plant and/or animal origin (agricultural produce, co-products, by-products, i.e. BIOMASS as a whole) into new food ingredients and concentrates and / or natural & bio-organic fertilisers :

- simple or complex, restructured and respecified ;
- with a high nutritional value, specific, and well-balanced ;
- with nutrients and trace elements which become easily assimilated by all living organisms belonging to the UNIVERSAL FOOD CYCLE
 - Of perfect microbiological (bacteriological) quality ;
 - With an optimum coefficient of conversion ;
 - With high added value ;
 - Easy to handle and preserve (without becoming rancid).

* QUICK RETURN ON INVESTMENT*

NO WASTE (neither solid nor liquid) at the end of processing.
